Supplemental Application:

How do I complete the supplemental application for SCCO?

SCCO's supplemental application is part of your OptomCAS application.

The word "supplemental" implies that there is a whole other questionnaire that is required, however this is not the case. Once you've completed the essay questions as part of your application submitted through OptomCAS, you have completed SCCO's supplemental application as well.

It takes about 3-4 weeks from when you submit your application to when SCCO receives it, at which time you will be prompted via email to pay the \$75 supplemental application fee and processing of your application will begin.
