Biochemistry Online Courses Accepted by SCCO:

A biochemistry course that would be acceptable to fulfill the pre-requisite requirements is very difficult to find at the community college level. Any suggestions?

- SCCO accepts online courses from any regionally accredited college (i.e. WASC accredited).
- SCCO accepts online courses for any that DO NOT require a lab class.
- Some online courses are formatted so that the course is given online and the lab is given in a classroom setting. This is acceptable.

Here are links to online biochemistry courses accepted by SCCO which meet the pre-req requirements:

UC Berkeley (recommended for course content and competitive price by students who have completed the course):

<https://extension.berkeley.edu/search/publicCourseSearchDetails.do?method=load&courseId=41570>

University of New England: <http://online.une.edu/science-prerequisites/online-medical-biochemistry/>
